Every city and town faces problems with vandalism and graffiti. These are some of the hardest crimes to solve and monitor. Traditional CCTV solutions are expensive and do not work.

PixController Raptor Cellular/WiFi cameras are portable self-contained covert security cameras which can be deployed quickly into remote areas and send photos to your PC and/or Cell Phone when triggered.

PixController, Inc. specializes in outdoor, self-contained, battery operated, surveillance camera systems. Our motion activated cameras are designed for long-term use to monitor remote sites without power or Internet.
